

## 48/3147 Bug Box Craft Kit

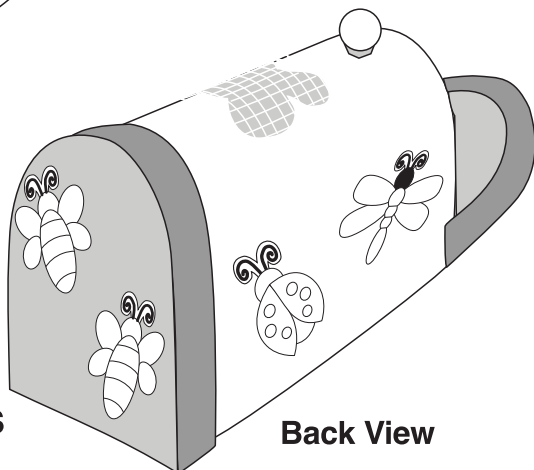

Be sure to have adult supervision if using a hot glue gun for this craft.

1. Open the box door and apply glue around the circle inside the box, then carefully glue the small square plastic grid to the inside of the door over the precut circle. Glue the black elastic loop to the inside rim of the door to secure. Make sure the loop is pulled through the hole in the top of the door so that it may be used to latch the door shut. Allow time to dry.
2. Roll the longer plastic grid piece lengthwise, creating a curve like the top of the box. Apply glue to the inside edges of the precut butterfly shape and glue the curved plastic grid to the inside of the box. Hold in place until dry.
3. Close the door to the box and glue the light blue wooden plug to the top of the box as shown.
4. Glue one foam ladybug to the front door and then glue one foam ladybug and one foam dragonfly to right and left sides of the box. Glue two yellow bee's to the backside of the box. Allow time for your craft to dry.
