

48/5543 Wooden Rosary Craft Kit

Please be sure to have adult supervision if using a glue gun for this craft.

1. Thread the cord through the wooden cross bead and knot the cord together. The cross should be at the end of the cord.
2. Make a knot about an inch up the cord and then thread a large green bead onto the cord. Make a knot directly above the green bead.
3. Thread the three light purple beads next and make a knot above them. Tie another knot close to that knot.
4. Thread the small green bead and then the large purple bead. Make a knot above the purple bead, but leave room between the green and purple, you will be making another knot between these two beads later.
5. Thread the ten blue beads, make a knot after the last blue bead. Make another knot above that knot and add a large green bead. Knot after the green bead twice, then thread on the pink beads. Continue in this way for the yellow, aqua and orange beads.
6. When you have made a knot after the orange beads, thread the remaining cord back through the large purple and small green bead. Make a knot between the purple and green beads, then knot the end of the cord on the other side of the green bead.
