

48/5885 Apple Tree Handprint Keepsake Craft Kit

Please have adult supervision if using a glue gun for this craft.

1. To avoid spilling paint, lay the paper tree on top of a piece of scrap paper (not included). Coat your hands with two colors of green paint, then press your hands down onto the paper tree about 8 times to make 8 handprints. It is okay that the handprints overlap to make the tree shape. Thoroughly wash your hands, and allow time for the paint to dry.
2. Glue two leaves to each apple and then glue each apple to the tree as shown.
3. To make the hanger, glue each end of the satin ribbon to the back of the paper tree. Allow time for your craft to dry completely before hanging.
