

Make your own Flip Flops

by Angie

You Will Need:

- 57/2009 Fabulous Foam Sheets
- 57/202 Pearl Pony Beads
- 57/4000 . . Thick Chenille Stem Classpack - 6mm
- 57/2253 . Terrific Tropical Adhesive Foam Shapes

1. Trace your shoe onto a foam sheet, cut out. Use this as a pattern and cut out five more. Cut flowers out of foam.
2. Fold a chenille stem in half. Poke the fold through one foam flip flop (near where the toe strap should be inserted), fold it flat against the back of the foam. Thread pony beads down the chenille stem straps then poke each end on the sides of your footprint where the back of the strap should be inserted. Fold it flat back against the back of the foam to secure. Do this for the other flip flop.
3. Glue two plain footprints together for both feet, then glue the beaded footprints on top of them to secure the chenille stem ends inside. Decorate with foam flowers or shapes, and wear your new flips home!
